The main emphasis of Mr. Jain's address was on "Innovation & customers' Satisfaction through innovation & Constant R & D work has make Tata Motors, one of the 500 Fortune companies in the world. Mr. A. K. Jain told Mr. Thomas Edison who invented the 'Bulb', after 10,000 unsuccessful experiments. He did not termed them as failure but said, he learned 10,000 methods of how not to make a bulb. Each failure must be treated as a step of a success ladder. The color of the balloon whether black or white does not decide to what height will the balloon reach but it's the content (gas) of the balloon. Similarly in case of we human being it's the desire in our belly which takes us up. In case of Tata Motors this desire level is very high and departments such as Creative Engineering, Virtual Relaiity Centere, R & D work on this principle, Meaning of NO is Next Opportunity. The main characteristics of Tata Motors are: Quality, Durability, Performance and Safety
